HIGHEST AND BEST USE
 ANALYSES AND COMMENTS:
 High and Best Use (HBU) may be defined as a reasonable and probable use which will support the highest present value, as defined, as of the effective date of the appraisal. Alternatively, the use, from among reasonably probable and legal alternative uses, found to be physically possible, appropriately supported, financially feasible, and which results in the highest value. The HBU estimates consider the Municipal Development Plan (MDP), any relevant Area Structure Plan (ASP) and the above referenced land use bylaw. The HBU, as though vacant land, is estimated as residential single family use. The HBU, as improved, is estimated as residential single family use with the current improvements in place.

COMPARABLE RENT DATA
 COMMENTS:
 The market offers a limited selection of rental data. In all cases, comparable rental indices most similar to the subject were selected. Quantitative adjustments have not been made due to the inherent difficulty of estimating the contributory rent for subtle or incremental differences between the subject property and indices chosen. Instead, the following qualitative analysis is presented:

Index 1: A 2 bed, 1.5 bath townhouse located in the subject complex. Comparable finishes, including stone counters, with comparable parking utility. Water included.
 Index 2: A 3 bed, 2.5 bath townhouse located in the developing community of Sunset Ridge. Comparable finishes, including stone counters, with outdoor parking and unfinished basement. Provides fenced rear yard. Utilities not included. *Size estimated based on neighboring property.
 Index 3: A 3 bed, 2.5 bath detached home located in the subject community. Comparable condition, with outdoor parking and unfinished lower level. Provides fenced rear yard. Utilities not included.

Upon reconciliation, comparable rental indices form range of \$1,950 to \$2,490. Index 2 is seen as the strongest indicator of value, with Indices 1 and 3 representing lower and upper limits, respectively. Although all two-storey units, these are seen as most representative of the subject market, providing comparable marketability. After adjustment, comparable indices form a range of \$2,050 to \$2,250. The owner being responsible for property taxes, maintenance, insurance, and management fees. The tenant being responsible for all utilities. Listing IDs available at Rentfaster.ca.

HISTORY	ANALYSIS OF RENT HISTORY: <u>N/A</u>
EXPOSURE TIME	ANALYSIS OF REASONABLE EXPOSURE TIME: <u>Exposure Time is the estimated length of time the property interest being appraised would have been offered on the market before the hypothetical consummation of a lease at market rental rates on the effective date of the appraisal. It is a retrospective estimate based upon an analysis of past events assuming a competitive and open market. With no data available for the Cochrane market, the 2022 CMHC market rent report released February has been relied upon for a board indication of rental rates across the area. The report indicates a vacancy rate of 4.2% for the average two bed condominium. Converted to how many days per year a property would be vacant, this translates to 15 days. The Exposure Time for the subject is estimated at 15 to 45 days. This is not an estimate as to how long the subject's estimated rent rate will remain as stated. *It should be noted that conversation with industry professional, as well as local publications have pointed to a very healthy rental market with upward pressure on rental rates.</u>
RECONCILIATION AND FINAL RENT	RECONCILIATION AND FINAL ESTIMATE OF RENT: <u>Upon reconciliation, comparable rental indices form range of \$1,950 to \$2,490. Index 2 is seen as the strongest indicator of value, with Indices 1 and 3 representing lower and upper limits, respectively. Although all two-storey units, these are seen as most representative of the subject market, providing comparable marketability. After adjustment, comparable indices form a range of \$2,050 to \$2,250. The owner being responsible for property taxes, maintenance, insurance, and management fees. The tenant being responsible for all utilities. Listing IDs available at Rentfaster.ca.</u>
DEFINITIONS	AS AT <u>October 17, 2022</u> (Effective Date of the Appraisal) IS ESTIMATED BETWEEN \$ <u>2,050</u> AND \$ <u>2,250</u> COMPLETED ON <u>October 17, 2022</u> (Date of Report) As set out elsewhere in this report, this report is subject to assumptions and limiting conditions, the verification of which is outside the scope of this report.
	DEFINITION OF MARKET RENT: The estimated amount for which an interest in real property should be leased on the valuation date between a willing lessor and a willing lessee on appropriate lease terms in an arm's length transaction, after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion. (International Valuation Standards 2017)
	DEFINITION OF HIGHEST AND BEST USE: The reasonably probable use of real property, that is physically possible, legally permissible, financially feasible, maximally productive and that results in the highest value. (CUSPAP 2018)
SCOPE	The scope of the appraisal encompasses the due diligence undertaken by the appraiser (consistent with the terms of reference from the client, the purpose and intended use of the report) and the necessary research and analyses to prepare a report in accordance with the Canadian Uniform Standards of Professional Appraisal Practice (CUSPAP) of the Appraisal Institute of Canada. The following comments describe the extent of the process of collecting, confirming and reporting data and its analyses, describe relevant procedures and reasoning details supporting the analyses, and provide the reason for the exclusion of any usual valuation procedures. The appraisal issue that is the focus of this engagement has been discussed and defined with the client, the work required to solve the issue planned, and the necessary market data acquired, analyzed and reconciled into an estimate of market rent in a manner typically expected in a "form" report. The specific tasks and items necessary to complete this assignment include a summary of the following: 1. Assembly and analyses of pertinent economic and market data; 2. An analysis of land use controls pertaining to the subject property; 3. An analysis of "Highest and Best Use", or most probable use; 4. A discussion of the appraisal methodologies and procedures employed in arriving at the indications of value; 5. Inclusion of photographs, maps, graphics and addendum/exhibits when deemed appropriate; and 6. Reconciliation of the collected data into an estimate of market rent range as at the effective date.
	All data considered appropriate for inclusion in the assignment is, to the best of our knowledge, factual. Due to the type of property being appraised and the nature of the appraisal issue, the findings have been conveyed in this "form" format.
